JULY 2022 #22

THE 'LONG NIGHT OF SCIENCE' GATHERED AROUND 300 ATTENDEES IN DRESDEN

On 18 June and on 8 July, [Maelgwyn Mineral Services](#) and [Helmholtz-Zentrum Dresden-Rossendorf \(HZDR\)](#) Freiberg teams presented FineFuture innovations to the general public at the long night of science of [TU Bergakademie Freiberg](#) at Helmholtz Institute Freiberg for Resource Technology (HIF) at HZDR NdWW2022.

Multiple experts of the FineFuture consortium contributed and introduced the FineFuture project, the pilot scale equipment developed, and the applicability of these findings for multiple industries to a broader audience. The purpose of these events is to engage with stakeholders that are not necessarily scientific but to attract their interest in the added value of science, the implementation of the results, and the added value of EU-funded innovation for multiple industries.

Despite the unusual heat outside, the response was positive, as 3000 attendees (locals, students and researchers) gathered around the academy.

Funded under H2020-EU

Overall budget: € 6 195 022,50

EU contribution: € 6 195 022,50

Grant agreement ID 821265

Start date: 1 June 2019

End date: 31 November 2022
