NOVEMBER 2022 #23

FINE FUTURE PRESENTED DURING THE EU LATIN AMERICA RAW MATERIAL CONVENTION

On the 3 and 4 of November, the 2022 EU-Latin America Convention on Raw Material took place in Santiago, Chile. The convention brought together the mineral raw materials value chain community, including policymakers, industry, private sector, academia and innovation actors, from the EU and Latin America, under the overarching theme: Mineral Raw Materials for the Clean Energy Transition.

The convention was organized as a hybrid event with more than 150 participants in person and a similar number of participants online. The two-day event started with a high-level political session with representatives from seven Latin American countries and the European Commission. This session was followed by different panels addressing various topics relevant to fostering collaboration along mineral supply chains between the EU and Latin America.

Under the session dedicated to “Opportunities in the EU Industrial alliances and EU external cooperation action” Aurela Shtiza presented the FineFuture project and the pilot testing performed on the iron ore tailings from Vale operations in Brazil. This cooperation was made possible thanks to the research teams of Lorraine University, Clariant Brazil and Vale Brazil.

Funded under H2020-EU

Overall budget: € 6 195 022,50

EU contribution: € 6 195 022,50
